

## CONTROL PANEL ENGINEER

JOB REF:0532

Our client is a very well-established heavy equipment supplier with a niche range of products aimed at the waste recycling industry. Based in Co Tyrone, the Company export their products worldwide and are now seeking to appoint a Control Panel Technician to add to their small team.

### Job Purpose:

The successful candidate will be responsible for building starter panels for the various equipment manufactured as well as designing and updating panel designs using AutoCAD and E3/EPlan based software packages.

### Duties/Responsibilities:

- Build all control panels to the specification required and in line with current regional electrical/mechanical standards
- Carry out testing on all panels and fault find/fix any issues with the control panel
- Designing new systems and/or making changes/improvements to existing designs
- Compile P&ID diagrams, mechanical layout drawings, schematic diagrams, 17th Edition cable calculations, and electrical installation diagrams.
- Work closely with customers to determine requirements and make any necessary changes needed/requested.
- Update all files to ensure all work is saved and filed appropriately with correct labelling and revisions

### Control Panel Engineer - Person Specification

- Extensive experience in building control panels along with experience in a design position within the control panel industry
- Experience using E3/ EPLAN and AUTOCAD
- Innovative with regard designs
- Ability to work as part of a team
- Ability to work to deadlines
