

BUSINESS ANALYST

JOB REF: 0563

Our client is a \$4.5 billion, publicly traded global manufacturer of lifting and material processing products and services. As a result of extensive and sustained growth, they are now recruiting a Business Analyst for their team in Lurgan.

Job Purpose

The purpose of this job is to create competitive advantage by analysing data and providing KPI's to key business stakeholders.

The role will support the implementation of strategies, utilizing global data from multiple systems. This role will be critical in developing the Strategic Sourcing Organization by establishing, continuously improving and maintaining data, systems and process capabilities.

Responsibilities:

- Providing analytics and data management support to the Category Management and Wave Sourcing teams for the allotted category, including the validation of sourcing data throughout the Sourcing Lifecycle.
- Liaise with others to ensure accuracy of information relating to Supplier management – pricing, incoterms, payment terms, usage, forecast and supplier data.
- Identification and recommendation of opportunities and process improvements throughout the sourcing lifecycle.
- Act as Subject Matter Expert in the e-sourcing platform (BravoSolution), making ongoing recommendations to optimize use and features.
- Partner with Supply Chain Analytics, eCOST and Strategic Sourcing teams to ensure analytics is being properly deployed to facilitate:
 - Negotiations preparation including RFI/RFQ/RFP activity
 - Informed sourcing decisions
 - Supplier and internal opportunity identification
 - Implementation activities
 - Contract lifecycle management
 - Supplier value management
 - Price variance reporting and follow up
- Maintenance of a central repository for Sourcing documentation within the e-sourcing platform, ensuring all documentation is maintained in line with the appropriate naming convention.

- Work with the Supply Chain Business Process Manager to define and document sourcing processes for the Strategic Sourcing group, aligned with the 11-step sourcing methodology.
- Assist with monitoring and reporting of Key Performance Indicators and Scorecards.
- Other reasonable duties or project work as requested by the Director, Global Supply Chain Analytics.

Person Specification

- University degree in a relevant field such as Supply Chain, Information Systems, Business Administration, Mathematics etc.
- Strong analytics skills with proven experience in data analysis and research (Or graduate with theoretical knowledge of data analytics).
- Knowledge of data quality measurements methodology and reporting tools.
- Advanced Microsoft Office skills (Excel, PowerPoint, Word, Access).
- Ability to identify problems and provide effective solutions.
- Highly organized and prioritisation skills.
- Fluency in English, both written and spoken.
- Attention to detail.
- Good presentation, communication and relationship skills.
- Experience of using data visualization tools such as Qlik, Tableau, Microsoft Power BI.
- Knowledge of E-Sourcing Platforms.
- Financial awareness and ability to assess the commercial viability of data analysis and research.
- Working knowledge of ERP systems and reporting platforms.

Benefits:

- Attractive salary package and a full range of benefits, including pension, life assurance, health plans, employee stock purchase plans.
- Development opportunities both locally and globally.
- Early finish on Fridays.
- Excellent commute location.
- Employee Assistance program.
- Working at an international company with leading market products.
