

TECHNICAL ENGINEER

JOB REF: 0591

Our client is the UK and Ireland's largest steel lintel manufacturer and are the leading producer of "special" custom-made lintels to suit individual design requirements and exact specifications. Due to continuing growth, they are now looking for a dynamic individual who is self-motivated, well organized with good communication skills and sound business awareness to be based in their Cookstown office.

Job Purpose

Upon completion of 'on-the-job training', the successful candidates will be expected to work on their own initiative within a vibrant Technical Team and liaise directly with their customers. Successful candidates will be exposed to all aspects of the business, including technical design, project management and commercial activities.

Responsibilities:

- To prepare an accurate, competitive and detailed technical quote for the Company product range based on information received from customers
- Prioritise work appropriately to deliver product schedules within set deadlines
- Specify standard off-the-shelf products through load assessment and calculation
- Design custom-made items specifically for individual projects, using various structural software packages
- Produce technical customer confirmation drawings and production drawings
- Answer technical phone and email queries and serve the customer with the highest level of technical and customer service
- Periodic office and site visits to develop customer relationships
- Take onsite measurements and provide onsite technical advice to customers
- Liaise with builders, merchants, architects and engineers
- Work closely with external sales to deliver company targets.

Person Specification

- Degree educated from an Engineering-related discipline;
 - Construction / Building Engineering
 - Structural Engineering with or without Architecture
 - Civil Engineering
 - Quantity Surveying

- Knowledge of the construction industry is essential
- Experience in using AutoCAD
- Experience using Solid Works is desirable
- Experience using structural design software is desirable
- Good organisational skills, punctuality and professionalism
- Excellent communication and customer service skills
- Target driven & ambitious

Benefits

- Competitive salary.
- High quality on the job training with excellent support from colleagues within an excellent working environment.
- Professional career development and membership of a related professional body.
- Option to join the company's social club plus access to a wide range of health and well-being initiatives.
- Early finish on Fridays.
- Free on site parking
