

## PROJECT ENGINEER - OMAGH

JOB REF: 0615

Our client is a \$4.5 billion, publicly traded global manufacturer of lifting and material processing products and services. As a result of extensive and sustained growth, they are now recruiting for a Project Engineer to join their team in Omagh. This is an excellent opportunity to join a dynamic and friendly team and to learn from one of the largest engineering organisations in the world.

### Job Purpose

The role of Project Engineer is to work with all relevant departments to ensure New Product Development (NPD) programs are delivered effectively and to schedule, bringing new products through from concept to production and even the product review stage. This role is to track all required elements to ensure a smooth transition from design to production launch.

### Main Duties & Responsibilities:

- Coordination of department project plans.
- Regular review and reporting to the management team on the project status.
- Attendance & participation at S&OP.
- Constant interaction with Manufacturing, Engineering, Purchasing, Production, Operations.
- Achievement of project key targets.
- Creation of project risk analysis.
- Chairing of regular project meetings, ensuring that all disciplines attend, are enabled to take an active role and have effective cross-functional relationships.
- Perform other related functions at the discretion of your manager.

### Education & Qualifications:

- Degree educated or equivalent in engineering or related field.
- You will have ideally worked as a Project Engineer within a production environment; heavy manufacturing industry preferred.
- Must hold the relevant skills required to develop continuous improvements.

## Knowledge, Skills & Attributes

- Successful candidates should be able to demonstrate a collaborative and assertive skillset and the ability to monitor and interpret the computerised ERP System (Oracle) for parts and materials availability, and specific job requirements, ensuring all works are completed to schedule and quality parameters.
- Must be flexible and have a positive approach when tasked with resolving urgent or unexpected business and project eventualities.
- Ability to work independently with a high degree of autonomy.
- Exceptional interpersonal skills with the ability to communicate detailed verbal and written information to audiences of varied backgrounds, both technically and culturally.
- Strong project management and analytical skills.
- Ability to work in a fast-paced environment and manage deadlines.
- Ability to execute through completion and documentation.

## Benefits Package

- Salary £32K to £36K
- Pension, Life Assurance, Healthcare plus other attractive benefits.
