

## SOFTWARE DEVELOPER

JOB REF: 0718

Our client is a family orientated business, established nearly 40 years ago, that has developed into one of Northern Ireland's leading Sub-Contract Laser cutting manufacturing companies. They now wish to add a Software Developer to their team.

### Job Purpose

.NET programmer to design, modify, develop and implement in-house software programming applications and components; support and/or install software applications; write specifications using pre-established guidelines to perform the functions of the job and maintains documentation of process flow.

### Responsibilities:

- Lead the development of IT and Software solutions liaising with key stakeholders to implement and maintain delivery.
- Take ownership for product development and larger projects from concept to realisation.
- Implement continuous improvement ideas to improve software facilities and service within the Company.
- Utilize established development tools, guidelines and conventions including but not limited to C#, VB.NET, SQL Server, ASP.MVC, AngularJS, HTML, CSS, JavaScript, Web Services, SSRS and SSAS.
- Integrate existing software systems by developing & maintaining data integration streams.
- Design, code and test new Windows and web software applications.
- Enhance existing systems by analysing business objectives, preparing an action plan and identifying areas for modification and improvement.
- Maintain existing software systems by identifying and correcting software defects
- Investigate and develop skills in new technologies.
- Create technical specifications and test plans.

### Health and Safety:

- Carry out duties at all times in a safe and responsible manner whilst conforming to current Health and Safety Regulations.

**Communications:**

- Ensure communications are maintained at the highest possible level with colleagues and keep your Manager advised of impending situations which could develop into more serious problems.
- Develop mutual respect with all employees and colleagues, by ensuring that all dealings are objective and impartial.

**General:**

- Ensure compliance with the Company's Equal Opportunity Policy and maintain a neutral working environment.
- Assist in any other activities at the request of Management that may be required to support business needs.

**Person Specification**

- 2-3 years of relevant experience to include applications such as C#, VB.NET, ASP.MVC, SQL Server
- Bachelor's Degree in Computer Science
- Microsoft .Net C# with experience of VB.NET
- SAGE and SSRS experience as well as Qlikview or SSAS
- Experience of winForms development and/or WPF
- Web development to include ASP.MVC, AngularJS, HTML, Bootstrap
- SQL server development, TSQL and stored procedure knowledge
- In depth knowledge of design patterns

**Desirable Criteria:**

- Experience developing IT solutions within Industry, preferably within a Manufacturing /Engineering environment
- Xamarin Android and/or forms
- ERP / MRP practical knowledge
- Strong problem determination/analysis skills
- Strong analytical skills and capable of influencing decision on technical issues
- Ability to work on multiple projects and/or system implementation
